

## ACKNOWLEDGEMENTS

I would like to acknowledge the financial support the Capacity Building Program for New Researcher 2018 from National Research Council of Thailand (NRCT). I am heartily thankful to my advisor, Assoc. Prof. Dr. Tosawat Seetawan and my co-advisor, Dr. Mati Horprathum, whose encouragement, guidance and support enhanced my understanding of the subject.

I would like to also express high gratitude toward the Optical Thin film Technology Laboratory (OTL), National Electronics and Computer Technology center (NECTEC), Thailand, under Dr. Mati Horprathum and Materials Technology Center (MTEC), Thailand, under Dr. Chanchana Thanachayanont for the deposition facilities and the characterization equipment. In particular, I would like to thank the Thin Film Research Laboratory (TFRL), Center of Excellence on Alternative Energy (CEAE), Research and Development Institution, Sakon Nakhon Rajabhat University, Thailand, for training in thin film deposition process.

I would like to thank the thesis committee : Asst. Prof. Dr. Audom Trepparad, Assoc. Prof. Dr. Wilawan Kumharn, Dr. Athon Vora-ud and Dr. Hasakorn Wattanasarn their consultation has been very useful.

Furthermore, I want to acknowledge that the Center of Excellence on Alternative Energy (CEAE), Research and Development Institution and Program of Physics, Faculty of Science and Technology, Sakon Nakhon Rajabhat University, Thailand have facilitated this research. Finally, I want to thank my family for their enduring spiritual and moral support.

Natchanun Prainetr
